Academy Office – (301) 649-2880

Renay C. Johnson
Principal

January 6, 2017

Dear School Parents, Guardians, and Staff Members,

This is to inform you that follow-up testing for radon has been completed in our school. The most recent test results from the Montgomery County Public Schools (MCPS) Indoor Air Quality Unit indicate all of our rooms and offices tested had radon levels below the U.S. Environmental Protection Agency recommended action limit of 4.0 picocuries per liter of air (pCi/L).

For your information, radon is a naturally occurring radioactive gas that comes from the natural breakdown (decay) of uranium, which is found in soil and rock all over the United States. Our radon test results can be found on the MCPS Radon Testing and Mitigation Program web page at:

<http://www.montgomeryschoolsmd.org/departments/facilities/maintenance/default.aspx?id=458858>

This web page has additional information about radon and guidance on how to test your home for radon, if you have not already done so.

Sincerely,

Renay Johnson
Principal
